

Your new kitten and Orchard House Veterinary Centres

We want to ensure that your new kitten has the best start in life with access to the best levels of veterinary care, disease prevention, parasite control and microchipping. All this expert care will allow your kitten to get into the big world to explore and experience new things.

In addition, we can offer advice about nutrition and care so that you can maximise your enjoyment of having a happy and healthy kitten.

Your Kitten's treatment plan:

- 🐾 We offer FREE early checks for younger kittens if required
- 🐾 9 weeks old: 15-minute vet consultation which includes a full clinical examination, first vaccination, parasite control recommendation, dietary advice opportunity to join the Well Pet Club and 4 weeks free pet insurance from PetPlan
- 🐾 12 weeks old: second vaccination and vet health check, microchip offered and parasite control recommendation
- 🐾 From 5 months of age: your kitten can be neutered - neutering will prevent you from getting unwanted litters of kittens, can improve the behavior of your kitten and reduce health risks. We would microchip your kitten while anesthesia if not already done
- 🐾 15 months of age: annual booster vaccination, adult health check with a vet and parasite control recommendation
- 🐾 Annually thereafter: booster and vet health check and parasite control recommendation

At Orchard House Veterinary Centres we believe that prevention is better than cure. For this reason we recommend regular flea, tick and worm prevention treatment. We offer a range of innovative and convenient treatments only available on prescription. The options include oral tablets, spot-on treatments, sprays and collars and we can help you to choose the best option for your pets.

A vet check every six months will allow us to identify and treat any medical concerns quickly and efficiently.

Have you heard about our Well Pet Club?

As a member of the Well Pet Club, your feline friend, will be entitled to annual booster vaccinations and health, parasite control sufficient for 12 months and a six monthly veterinary examinations without having to pay a fee each time. A convenient monthly direct debit makes your cat's veterinary care work for you while saving you money each year.
